

Feeder Box Design

Alternative glazing option is to route a groove inside the sides at the front and slide the perspex in.

Has the advantage of being removable for cleaning out the box.

Hair Tube Design

Hair Tube

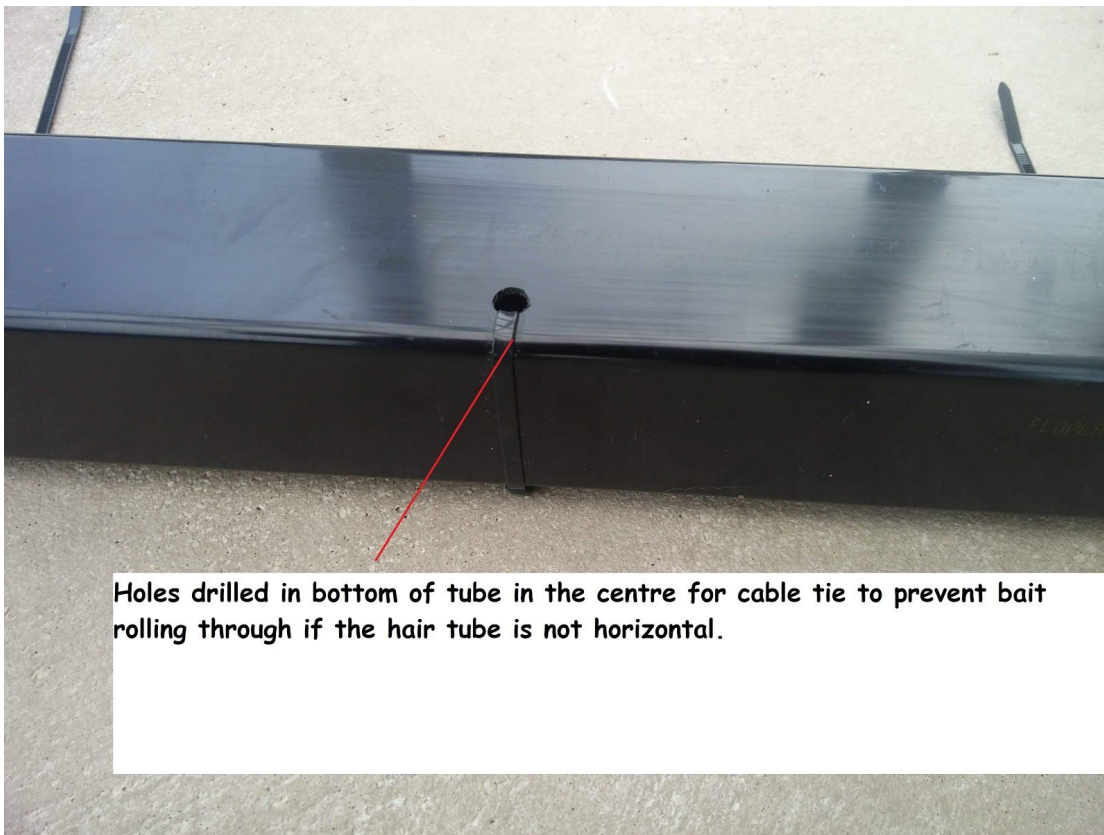

50mm x 50mm square plastic downpipe cut to 40cm long.

Holes drilled at each end in the top and bottom to attach either above or below a branch.

Attach using cable ties or garden wire.

Holes drilled in centre at the bottom to fix cable tie to prevent bait rolling through the tube if it is not level.

Velcro stuck in top at each end to collect hairs.

Holes drilled in bottom of tube in the centre for cable tie to prevent bait rolling through if the hair tube is not horizontal.

Hook velcro stuck inside top of tube hook side out.
Loop velcro affixed to hook velcro sticky side down so as to be removable and to collect squirrel hairs.
